Cover: The map illustrates tuberculosis case rates by reporting jurisdiction in 2000. Twelve jurisdictions have tuberculosis case rates above the state average of 9.5 cases per 100,000 population. Thirteen jurisdictions have tuberculosis case rates below the 2000 national rate of 5.8 per 100,000 population. Eight jurisdictions have case rates between the national and state rates (5.8 to 9.5 per 100,000 population). Case rates were not calculated for 28 jurisdictions because there were fewer than five cases in these areas. Jurisdictions of Berkeley, Long Beach and Pasadena are not represented on the map.
